

Peace of Mind While You Travel

Today, more and more people are traveling abroad for business and pleasure. You can now purchase an insurance policy that provides coverage, services and resources that will enhance your travel security and give you peace of mind. Policy services include pre-travel tips such as, culture information, current foreign exchange rates and travel advisories and alerts. The policy also includes emergency medical assistance, evacuation and repatriation, travel assistance, cash advance, location of lost or stolen items, legal assistance and interpretation/translation services. With this policy in place, you can feel confident that you are safe and protected while you travel. The policy is annual which means there is no need to purchase the coverage for each trip that you take. The policy protects you and your family throughout the entire year while on travel for business or pleasure, allowing you to travel without worry during a travel crisis.
